☰ Career Objective

Aim to work in a challenging environment where I can utilize my expertise in technical skills towards the development and implementation of new ideas, contributing to growth of the organization.

🏆 Achievements

Applause Award (Issued by Deloitte USI)

📅 Sep, 2022

An award of applause for going the extra mile by working on developing a POC and delivering a solution approach to the team to migrate all existing code bases to GitHub by configuring Azure Devops pipelines. [View Award](#)

Spot Award (Issued by Deloitte USI)

📅 Feb, 2022

An appreciation for all the continued commitment and contributions made by performing timely analysis and resolution of technical issues during critical business hours with no impact to the business flow. [View Award](#)

💼 Work Experience

Consultant

Deloitte Consulting India Private Limited.

📅 Mar, 2021 - `Present`

- Delivered 25+ successful releases with 0 defects and improved the performance of 3 crucial jobs by 75%.
- Saved 240+ man-hours/year by automating commission process and developing 4 custom parametized reports.
- Created a solution approach for the team by building a POC to migrate existing code bases from TFS to GitHub.
- By being cross-skilled, helped the team across various ETL tasks and performed 25+ sprint plannings.
- Saved 90% of client's time by building a multi-functional dashboard for 24*7 health monitoring of all systems.
- Served client in creating additional revenue streams in a short span of 15 days by onboarding two new partner carriers, which increased the sales by adding 20K+ more agents into the business.
- Played a key role in reducing the additional billings by altering all snowflake dependent services to utilize appropriate data warehouses.

Software Engineer

ProArch IT Solutions Private Limited.

📅 Aug, 2019 - Feb, 2021

- Designed, developed, tested and hosted an internal web application, which is currently in live to track the hours of 300+ employees and to submit their expense reimbursements.
- Worked on a utility billing application by designing and developing 15+ efficient UI components according to the requirement and developed the business logic behind them.
- Served as an individual contributor as well as in a team of 12 in creating, testing and deploying new API end points along with custom parametized reports as per the need.
- Contributed in migrating existing front-end components to angular and automated 4 crucial functionalities, which reduced manual intervention by 500+ hours/year.
- Analysed and worked on reducing the number of user clicks and increasing the page speed by 15% for some UI components, which improved the overall user experience.
